Education

B.Tech Amrita Vishwa Vidyapeetham, Coimbatore — CSE

Aug 2023 – Jul 2027

- GPA: 7.39 / 10.0

Vivekam Matriculation Higher Secondary School — PCMCS

Aug 2021 – May 2022

- Percentage: 90.83

Projects

Steam Clone (Game Purchase Platform) | *MERN Stack* [Frontend GitHub Repository](#) [Backend GitHub Repository](#)

- Built a Steam-like purchasing platform using the MERN stack with game browsing, downloads, admin approval workflows, and MongoDB persistence.
- Implemented RBAC (User/Employee/SuperAdmin), JWT authentication with AES encryption, and email-based OTP (2FA) for sensitive actions.
- Added security layers including RSA digital signatures, bcrypt password hashing, SHA-256 token storage, and audit logging.
- Developed a React + Vite frontend with protected routes and Axios interceptors, alongside a Node.js + Express backend enforcing middleware security and database constraints.

Personal Bookmarks Chrome Extension | *JavaScript, Chrome Extension API, HTML, CSS* [GitHub Repository](#)

- Developed a lightweight Chrome extension to capture and manage browser URLs using manual input and active tab extraction.
- Integrated Chrome Tabs API to programmatically retrieve the current tab URL and store it dynamically.
- Implemented persistent client-side storage using localStorage with JSON parsing and serialization.
- Designed dynamic UI rendering through DOM manipulation and event-driven programming.
- Structured extension configuration via manifest.json following Chrome Extension architecture standards.

Expense Monitor | *Ruby on Rails, SQLite, Bootstrap* [GitHub Repository](#)

- Built a multi-user expense tracking application using Ruby on Rails with MVC architecture and SQLite persistence.
- Developed a clean, responsive UI with Bootstrap and interactive dashboards for visualizing spending patterns.
- Enabled users to add, edit, and categorize expenses while maintaining isolated accounts per user.
- Implemented server-side validations and CRUD workflows for reliable data entry and reporting.

Areas of Interest

Database Management Systems • Computer Graphics Algorithms

Campus Roles

• **Lead Full-Stack Developer — Intel IoT Web Developer Club**

Leading development of club projects, managing repositories, and mentoring contributors.

Technologies

- Languages: Python, Ruby, JavaScript, Java, C, C++
- Frameworks: Node.js, Express.js, Ruby on Rails, React
- Databases: MongoDB, MySQL, SQLite, PostgreSQL
- Tools: Git, Linux, Unreal Engine 5, Blender

Certificates & Badges

- Udemy — Full Stack Web Development Bootcamp (Angela Yu)
- HackerRank — Python, SQL, JavaScript
- AWS Academy Graduate Badge — Cloud Foundations
